<b>1</b>	<b>Getting Started with Model Predictive Control</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.2	Models and Modeling . . . . .	1
1.2.1	Linear Dynamic Models . . . . .	2
1.2.2	Input-Output Models . . . . .	3
1.2.3	Distributed Models . . . . .	4
1.2.4	Discrete Time Models . . . . .	5
1.2.5	Constraints . . . . .	6
1.2.6	Deterministic and Stochastic . . . . .	8
1.3	Introductory MPC Regulator . . . . .	9
1.3.1	Linear Quadratic Problem . . . . .	9
1.3.2	Optimizing Multistage Functions . . . . .	11
1.3.3	Dynamic Programming Solution . . . . .	17
1.3.4	The Infinite Horizon LQ Problem . . . . .	20
1.3.5	Controllability . . . . .	22
1.3.6	Convergence of the Linear Quadratic Regulator . . . . .	23
1.4	Introductory State Estimation . . . . .	25
1.4.1	Linear Systems and Normal Distributions . . . . .	26
1.4.2	Linear Optimal State Estimation . . . . .	28
1.4.3	Least Squares Estimation . . . . .	32
1.4.4	Moving Horizon Estimation . . . . .	37
1.4.5	Observability . . . . .	40
1.4.6	Convergence of the State Estimator . . . . .	41
1.5	Tracking, Disturbances, and Zero Offset . . . . .	45
1.5.1	Tracking . . . . .	45
1.5.2	Disturbances and Zero Offset . . . . .	47
1.6	Exercises . . . . .	60
<b>2</b>	<b>Model Predictive Control — Regulation</b>	<b>89</b>
2.1	Introduction . . . . .	89
2.2	Model Predictive Control . . . . .	91
2.3	Dynamic Programming Solution . . . . .	107
2.4	Stability . . . . .	112
2.4.1	Introduction . . . . .	112

2.4.2	Stabilizing Conditions: No State Constraints . . .	113
2.4.3	Stabilizing Conditions: Constrained Problems . .	115
2.4.4	Monotonicity of the Value Function . . . . .	116
2.4.5	Further Properties of the Value Function $V_N^0(\cdot)$ . .	118
2.4.6	Summary . . . . .	123
2.4.7	Controllability and Observability . . . . .	125
2.4.8	Time-Varying Systems . . . . .	126
2.5	Examples of MPC . . . . .	131
2.5.1	Unconstrained Systems . . . . .	132
2.5.1.1	Linear Time-Invariant Systems . . . . .	132
2.5.1.2	Linear Time-Varying Systems . . . . .	134
2.5.1.3	Nonlinear Systems . . . . .	134
2.5.2	Systems with Control Constraints . . . . .	138
2.5.2.1	Linear Stable Systems . . . . .	138
2.5.2.2	Neutrally Stable Systems . . . . .	139
2.5.3	Systems with Control and State Constraints . . . .	142
2.5.3.1	Linear Systems . . . . .	142
2.5.3.2	Nonlinear Systems . . . . .	145
2.6	Is a Terminal Constraint Set $\mathbb{X}_f$ Necessary? . . . . .	147
2.6.1	Replacing the Terminal Constraint by a Terminal Cost . . . . .	147
2.6.2	Omitting the Terminal Constraint . . . . .	149
2.7	Stage Cost $\ell(\cdot)$ not Positive Definite . . . . .	153
2.8	Suboptimal MPC . . . . .	155
2.9	Tracking . . . . .	159
2.9.1	No Uncertainty . . . . .	159
2.9.2	Offset-Free MPC . . . . .	160
2.9.3	Unreachable Setpoints . . . . .	162
2.10	Concluding Comments . . . . .	167
2.11	Notes . . . . .	169
2.12	Exercises . . . . .	172
<b>3</b>	<b>Robust Model Predictive Control</b>	<b>187</b>
3.1	Introduction . . . . .	187
3.1.1	Types of Uncertainty . . . . .	187
3.1.2	Feedback Versus Open-Loop Control . . . . .	188
3.1.3	Robust MPC . . . . .	193
3.1.4	Tubes . . . . .	196
3.1.5	Difference Inclusion Description of Uncertain Sys- tems . . . . .	196

3.2	Nominal ( <i>Inherent</i> ) Robustness . . . . .	198
3.2.1	Introduction . . . . .	198
3.2.2	Difference Inclusion Description of Discontinu- ous Systems . . . . .	199
3.2.3	When Is Nominal MPC Robust? . . . . .	200
3.2.4	Input-to-State Stability . . . . .	203
3.3	Dynamic Programming Solution . . . . .	207
3.3.1	Introduction . . . . .	207
3.3.2	Preliminary Results . . . . .	209
3.3.3	Stability of Min-Max RHC . . . . .	213
3.3.4	“Feedback” MPC . . . . .	218
3.4	Tube-Based Robust MPC . . . . .	220
3.4.1	Introduction . . . . .	220
3.4.2	Outer-Bounding Tubes for Linear Systems with Additive Disturbances . . . . .	221
3.4.3	Tube-Based MPC of Linear Systems with Additive Disturbances . . . . .	226
3.4.4	Improved Tube-Based MPC of Linear Systems with Additive Disturbances . . . . .	234
3.5	Tube-Based MPC of Systems with Parametric Uncertainty	237
3.6	Tube-Based MPC of Nonlinear Systems . . . . .	242
3.6.1	The Central Path . . . . .	243
3.6.2	Ancillary Controller . . . . .	245
3.6.3	Controller Algorithm . . . . .	248
3.6.4	Analysis . . . . .	249
3.6.5	Choosing $\mathbb{Z}$ and $\mathbb{V}$ . . . . .	250
3.7	Notes . . . . .	255
3.8	Exercises . . . . .	258
<b>4</b>	<b>State Estimation</b>	<b>265</b>
4.1	Introduction . . . . .	265
4.2	Full Information Estimation . . . . .	265
4.2.1	State Estimation as Optimal Control of Estimate Error . . . . .	272
4.2.2	Duality of Linear Estimation and Regulation . . . .	275
4.3	Moving Horizon Estimation . . . . .	277
4.3.1	Zero Prior Weighting . . . . .	278
4.3.2	Nonzero Prior Weighting . . . . .	280
4.3.3	Constrained Estimation . . . . .	287
4.3.4	Smoothing and Filtering Update . . . . .	289

4.4	Extended Kalman Filtering . . . . .	292
4.5	Unscented Kalman Filtering . . . . .	294
4.6	Interlude: EKF, UKF, and MHE Comparison . . . . .	296
4.7	Particle Filtering . . . . .	301
4.7.1	The Sampled Density of a Transformed Random Variable . . . . .	304
4.7.2	Sampling and Importance Sampling . . . . .	307
4.7.3	Resampling . . . . .	324
4.7.4	The Simplest Particle Filter . . . . .	329
4.7.5	A Particle Filter Based on Importance Sampling . . . . .	338
4.7.6	Optimal Importance Function . . . . .	343
4.8	Combined MHE/Particle Filtering . . . . .	348
4.9	Notes . . . . .	356
4.10	Exercises . . . . .	358
<b>5</b>	<b>Output Model Predictive Control</b> . . . . .	<b>371</b>
5.1	Introduction . . . . .	371
5.2	A Method for Output MPC . . . . .	373
5.3	Linear Constrained Systems: Time-Invariant Case . . . . .	376
5.3.1	Introduction . . . . .	376
5.3.2	State Estimator . . . . .	377
5.3.3	Controlling $\hat{x}$ . . . . .	378
5.3.4	Output MPC . . . . .	380
5.4	Linear Constrained Systems: Time-Varying Case . . . . .	384
5.4.1	Introduction . . . . .	384
5.4.2	State Estimator . . . . .	385
5.4.3	Controlling $\hat{x}$ . . . . .	385
5.4.4	Control of the Nominal System . . . . .	388
5.4.5	Control of the State Estimator . . . . .	390
5.5	Offset-Free MPC . . . . .	391
5.5.1	Estimation . . . . .	392
5.5.2	Control . . . . .	394
5.5.3	Stability Analysis . . . . .	397
5.6	Nonlinear Constrained Systems . . . . .	399
5.6.1	Introduction . . . . .	399
5.6.2	State Estimator . . . . .	399
5.6.3	Nominal MPC . . . . .	400
5.6.4	Tube-Based Output MPC . . . . .	401
5.6.5	Choosing $\mathbb{Z}$ and $\mathbb{V}$ . . . . .	403
5.7	Notes . . . . .	403

5.8 Exercises . . . . .	406
<b>6 Distributed Model Predictive Control</b>	<b>409</b>
6.1 Introduction and Preliminary Results . . . . .	409
6.1.1 Least Squares Solution . . . . .	410
6.1.2 Stability of Suboptimal MPC . . . . .	415
6.2 Unconstrained Two-Player Game . . . . .	421
6.2.1 Centralized Control . . . . .	422
6.2.2 Decentralized Control . . . . .	423
6.2.3 Noncooperative Game . . . . .	424
6.2.4 Cooperative Game . . . . .	433
6.2.5 Tracking Nonzero Setpoints . . . . .	438
6.2.6 State Estimation . . . . .	445
6.3 Constrained Two-Player Game . . . . .	446
6.3.1 Uncoupled Input Constraints . . . . .	448
6.3.2 Coupled Input Constraints . . . . .	451
6.3.3 Exponential Stability with Estimate Error . . . . .	453
6.3.4 Disturbance Models and Zero Offset . . . . .	455
6.4 Constrained $M$ -Player Game . . . . .	459
6.5 Nonlinear Distributed MPC . . . . .	461
6.6 Notes . . . . .	463
6.7 Exercises . . . . .	467
<b>7 Explicit Control Laws for Constrained Linear Systems</b>	<b>483</b>
7.1 Introduction . . . . .	483
7.2 Parametric Programming . . . . .	484
7.3 Parametric Quadratic Programming . . . . .	489
7.3.1 Preliminaries . . . . .	489
7.3.2 Preview . . . . .	490
7.3.3 Optimality Condition for a Convex Program . . . . .	491
7.3.4 Solution of the Parametric Quadratic Program . . . . .	494
7.3.5 Continuity of $V^0(\cdot)$ and $u^0(\cdot)$ . . . . .	498
7.4 Constrained Linear Quadratic Control . . . . .	499
7.5 Parametric Piecewise Quadratic Programming . . . . .	501
7.6 DP Solution of the Constrained LQ Control Problem . . . . .	507
7.7 Parametric Linear Programming . . . . .	508
7.7.1 Preliminaries . . . . .	508
7.7.2 Minimizer $u^0(x)$ is Unique for all $x \in \mathcal{X}$ . . . . .	510
7.8 Constrained Linear Control . . . . .	513
7.9 Computation . . . . .	514
7.10 Notes . . . . .	514

7.11 Exercises . . . . .	516
<b>Author Index</b>	<b>520</b>
